

REZA HASHEMI

Front End & Node.js developer

ABOUT ME

I am a passionate developer and interested in frontend and programming.
I've mastered React, Redux, and Next.js and have been able to make the most of these technologies in numerous projects. I love clean code.
Today I work as a backend developer with Node.js, MongoDB and Redis.
I am always looking to learn and acquire new skills and enjoy working in dynamic teams.
I'd rather be the smallest person on a big team than add to my knowledge every day.
